## COMPANY QUALITY POLICY

[www.vdmaustralia.com](http://www.vdmaustralia.com)

VDM Metals Australia Pty Ltd is Australia's leading importer and distributor of High Performance Nickel based alloys and supplies products in the form bars, plates, sheets, pipes, tubes, fittings as well as semi-finished and pre-manufactured items.

The Management of VDM Metals Australia Pty Ltd has adopted a policy of sourcing these High Performance Nickel alloys only from reliable, approved suppliers to ensure all products conform to the applicable industry standards and meet the quality requirements our customers expect. The objective is to achieve customer satisfaction in a proactive, professional and cost effective manner.

Copies of all relevant manufacturer QA accreditations / approval certificates are kept on file, reviewed on a regular basis and can be supplied upon request.

The company's internal quality manual procedures stipulate that upon receipt of any shipment from our suppliers each item must be checked and verified against the PO as well as in particular the documentation received from the supplier (grade, size, heat number, etc.). We warrant to our clientele that any and all material supplied is fully traceable to the original manufacturer's mill certificate.

VDM Metals Australia Pty Ltd does retain the manufacturing and mill test certificates for a minimum of five (5) years.

Yours faithfully,

  
Lutz Toriedt  
Managing Director
